1. The Lodz (5145N-1928E) power plant is located near the Kilinskiego crossroads 25X1 on ul. Przejazd, within the block between ul. Targowa and the Main Post Office building. The local and long distance telephone center is housed in the Post office building.
2. The entrance gate to the power plant is situated on ul. Przejazd, as well as two buildings belonging to the plant. One of these buildings has three offices and a large day or club room. The other consists of large halls. The generating plant is located to the rear of the two buildings, between the buildings and the warehouse.
3. Tracks connect the generating plant to the warehouse. A branch of a railroad line which runs from Koluszki (5146N-1948E) transports fuel for the generating plant to the warehouse.
4. The entire plant is surrounded by a high wall. A pass is needed to gain admission to the area; civilian industrial guards guard the plant.
5. The power produced at this plant is used partially to supply the Lodz area factories. The remainder of the power produced is relayed to factories in Warsaw, Katowice, and Czestochowa.
